

D-Tower

Sodi Scientifica is proud to introduce its new road side housing **D-Tower** sleek design and unsurpassed look.

D-Tower is suitable for urban installation but thanks to its robust design and an innovative cooling system, finds itself comfortable in extreme environmental conditions where highest reliability and availability are key.

D-Tower is an expandable modular platform, designed to house Sodi Scientifica's enforcement units therefore allowing for Speed, Red Light enforcement or the two simultaneously. **D-Tower** can be also equipped with a speed early warning system informing drivers of their approaching speed, before they pass in front of the enforcing unit.

D-Tower's environmental monitoring, surveillance sensors, HD video recorder unit and data transmission systems can be easily housed in dedicated modules.

In few words: **D-Tower**, absolute integrated traffic enforcement and surveillance power.
